### Abstract

© Serials Publications. Worldwide growth of the international relations in science and technology demands from higher educational institutions graduates with Bachelors' degrees abilities to use information from foreign sources, namely the knowledge of a foreign language for specific purposes. Educational process in higher education institutions isn't possible without continuous updating and development of methodological equipment: educational literature, technical means. The ways how to solve the problems of updating and development of methodological equipment of the higher school in a modern Russian higher educational institution, in particular a technical one are represented in the article. The methodology, the pedagogical principles of drawing up manuals as the main component of an educational and methodological complex on studying the discipline "Foreign language" in the technical university was discovered. The presented manuals have been approved and introduced into educational process in the branch of the Tyumen industrial university in Surgut.
